1.0 Introduction

1.1 Purpose of this document

The purpose of this document is to define the user interface specification for truYum project.

1.2 Definitions & Acronyms

Definition / Acronym	Description
HTML	Hyper Text Markup Language
CSS	Cascading Style Sheet

1.3 Project Overview

Refer truYum-use-case-specification.docx for understanding the functionality and features.

1.4 Scope

Develop static HTML web pages for truYum application.

1.5 Intended Audience

- Product Owner
- Scrum Master
- Application Architect
- Project Manager
- Test Manager
- Development Team
- Testing Team

1.6 Hardware and Software Requirement

1. Hardware Requirement:
 - a. Developer Desktop PC with 4GB RAM
2. Software Requirement

- a. Notepad ++ for editing HTML and CSS
- b. Chrome Browser

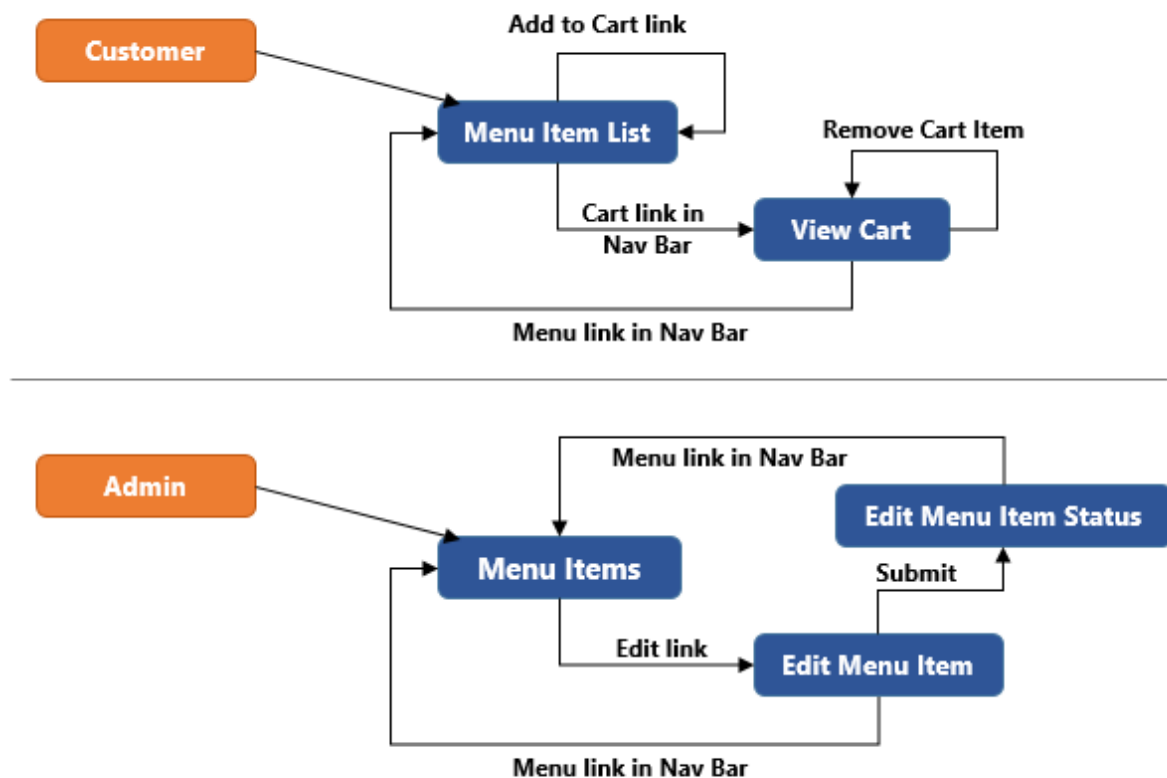

2.0 Preparing the folder structure

Create the below folder structure for placement of files appropriately:

```
truyum-ui
|_ images
|_ js
|_ style
```

3.0 Screen Flow

Flow of screens for Customer and Admin provided below. Blue boxes represent pages. Orange boxes represent the user role. The label in the lines denote the link in the page used to arrive from the specific page.

4.0 View Menu Item List (TYUC001 & TYUC002)

4.1 Menu Item List Admin

Displays the list of menu items. Each menu item will have option to edit a particular menu item

File: truYum/menu-item-list-admin.html

truYum 

Menu

Menu Items

Name	Price	Active	Date of Launch	Category	Free Delivery	Action
Sandwich	Rs. 99.00	Yes	15/03/2017	Main Course	Yes	Edit
Burger	Rs. 129.00	Yes	23/12/2017	Main Course	No	Edit
Pizza	Rs. 149.00	Yes	21/08/2017	Main Course	No	Edit
French Fries	Rs. 57.00	No	02/07/2017	Starters	Yes	Edit
Chocolate Brownie	Rs. 32.00	Yes	02/11/2022	Dessert	Yes	Edit

Cart	Link	Displays <code>cart.html</code>

7.1 Cart Empty

Displays the view when there are no items in the cart. The Menu Item List link in the message should point to `menu-item-list-customer.html`.

File: `truyum-ui/cart-empty.html`

Field Specification

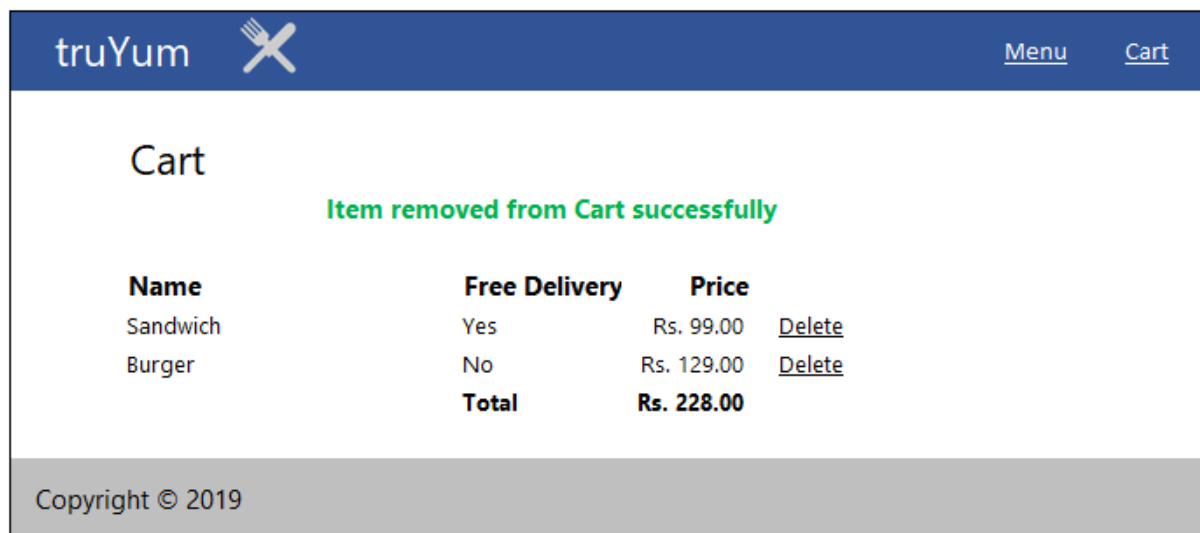

Field Name	Field Type	Description
Menu	Link	Displays <code>menu-item-list-customer.html</code>
Cart	Link	Displays <code>cart.html</code>

8.0 Remove item from Cart (TYUC005)

8.1 Remove Cart

When Customer click 'Delete' link in `cart.html`, this page is displayed with the message that the item had been removed from the Cart successfully.

File: `truyum-ui/cart-notification.html`

Field Specification

Refer section View Cart

9.0 Standards and Guidelines

9.1 HTML

1. Place all HTML files under `truyum-ui` folder.
2. HTML5 semantic tags has to be used wherever applicable. Avoid using `div` tags for header, footer, article and navigation bar.
3. Document Type should be defined as in the first line of the HTML document.
`<!DOCTYPE html>`
4. Form fields must always include a `<label>` element with a "for" attribute matching the "id".
`<label for="field-email">email</label>`
`<input type="email" id="field-email" name="email" value="" />`
5. Each form field should have "name" attribute.
6. All tag names and attributes must be written in lowercase.

7. Inline style should be never used. Style should be in an external CSS and should be linked to the document.
8. Image files should be placed in `truyum-ui/images` folder.
9. Add one more tab on the next line after opening a tag
10. Reduce one tab on line when tag is closed

9.2 CSS

1. CSS files names should be `style.css`
2. CSS files should be placed in `truyum-ui/style` folder.
3. Feel free to change the Background Color, Font, Font Size and Font Color of the screen. But it should be applied consistently across screens using CSS. Following are the element in the screen that can be targeted for style change:
 - a. Navigation Bar
 - b. Page Heading
 - c. Form Elements
 - d. Messages
4. Reuse styles wherever applicable. Potential areas are Application Name, Page Title, Form Fields and Buttons
5. Selector names should be in lower case with words separated by hyphen.

```
.page-title {  
    margin: 20px;  
}
```
6. Selector class names should be relevant to the purpose of the element where the style is applied. For example if common style needs to be applied for all text boxes in an application.
7. Properties should be followed by a colon and a space
8. Properties and values should be in lower case
9. Use hexadecimal code for color definition
Example:

```
.login-form {  
    background: #fdfdfd;  
    display: block;  
    margin: 0;  
    margin-left: 20px;  
}
```

9.3 JavaScript

1. JavaScript file name should **script.js**
2. JavaScript file should be placed in folder **truyum-ui/js**
3. Use camelCase for variables and functions.

```
var firstName = "John";  
function alert() {  
    alert("This is an alert message.");
```

}

4. All variable names start with a letter.
5. Always put a space before and after an operator.
`var profit = sellingPrice - buyingPrice;`
6. Always end a statement with semicolon.
7. Open curly braces should be in the same line.
8. All lines following open curly braces should have one level of indent
9. Closing curly braces should be in next line with reduction of indent by one level

Example

```
if (time < 20) {  
    greeting = "Good day";  
} else {  
    greeting = "Good evening";  
}
```
